Web Development -Intern

Project Experience: Pizza Ordering System Development

Technologies Used: **MERN Stack**

- User Authentication:
 - Developed admin and user login systems with registration and authorization.
 - Implemented email verification and a forgot password feature.
- Dashboard Implementation:
 - Created a user dashboard to view available pizza varieties.
 - Designed an intuitive UI/UX for easy navigation.
- Custom Pizza Builder:
 - Enabled users to customize pizzas by selecting bases, sauces, cheeses, and veggies.
- Inventory Management:
 - Designed an inventory system for tracking stock levels of ingredients.
- Stock Management:
 - Automated stock updates after orders and set up notifications for low stock.
- Order Management:
 - Developed an order tracking system for status updates, reflecting changes in the user dashboard.

Project Experience: Pharmacy Stock Management System

Technologies Used: **Laravel (Backend), React (Frontend)**

- **Product Management:** Created modules for adding, updating, and categorizing products.
- **Purchases and Sales:** Developed tracking for purchase orders and sales transactions.
- **Supplier Management:** Implemented a system to manage supplier information.
- **Reporting:** Generated reports for sales, inventory, and purchase history.
- **Access Control:** Established role-based permissions for user access management.
- **User Management:** Built a user profile system for customization and management.
- **Settings:** Created an application settings module for easy configuration.
- **Dashboard:** Designed an intuitive dashboard for key metrics and notifications.
- **Stock Notifications:** Set up alerts for low stock levels to facilitate reordering.
